

# BARKS SAMPLE - WRITTEN BY ANDREW IVIMEY

The following is a barks writing sample for a fictional video game, ALIEN OCCUPATION, a shooter that takes place in the near future where aliens have invaded and occupied most of the Earth. Despite the dire circumstances, groups of human resistance hold out and organize a resistance to fight back. Last Of Us's depiction of humanity vs Gears of Wars depiction of unknown enemies. Aliens are 7ft tall spider like creatures, who can crawl on all legs but most often walk upright on two (think General Grievous or Goro) and have a spider face with multiple eyes. Despite the insectoid appearance the aliens have ships, weapons, armor, communication, and vastly outmatch the humans. The human resistance is composed of whoever is left and willing to fight; ex-military, survivalists, desperate fools seeking revenge, and the generally lucky.
